 adjusted as required by HCRD plans

Stream Channels  
 (perennial, seasonal,  
 or storm runoff)

Roads: NH DOT, corrected to match LIDAR

Wetlands & Ponds: from NWIplusNH\_2017

Contours: 2', from 2019 LIDAR

Map projection: EPSG:3614  
 NAD83(NSRS2007) / New Hampshire (ftUS)

Source: NH Fish & Game Department Wildlife Connectivity Model for New Hampshire

Project Goals:

- To create a model for identifying wildlife connectivity zones at multiple scales.
- To identify wildlife connectivity zones in NH.
- To make information on New Hampshire's wildlife connectivity zones available to land-use planners
