

Bronson Potter South trails

Dashed red line trails, and Old Mill Rd (dashed grey), have been located using an accurate GNSS receiver.
 Lines of small red circles = probable stone walls as seen in 2019-21 QL1 LIDAR data. 5' contours derived from 2019-21 LIDAR.
 Parcel lines (approx.) & buildings (accurate) from 2017 NRPC. Wetlands & Ponds from NWIPlusNH 2017. Roads from NH DOT 2021.
 Thick dashed red line is T/L according to USGS topos; thin green dashed line connects accurately located T/L monuments (and matches recent precise parcel surveys)
 Parcel background colors: Light green: Conservation or Town Forest; Yellow: other town lands; Dark green: State forest; Orange: other State land (G-1); White: private lands.
 Map projection: EPSG:3614 "NAD83(NSRS2007) / New Hampshire (ftUS)". GPS grid: WGS 84 0.001^a increments (≈ 360°/267' in Lat/Long).
